## PROMOTIONS

"A great teacher never strives to explain her vision: she simply invites you to stand beside her and see for yourself." ~~  
Rev. R. Inman

## SNIPPET

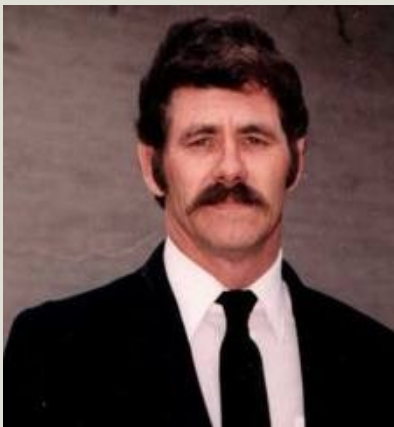

### **ABC orders Joss Whedon's 'S.H.I.E.L.D.' pilot**

The man who brought us a mega Marvel success this summer with "The Avengers" is aiming to do the same on the small screen.

According to the Hollywood Reporter, ABC has placed a pilot order for "S.H.I.E.L.D.," which will be co-written by "Avengers" writer/director Joss Whedon and possibly also directed by him, if he has the time for it. (As it stands, Whedon already has an "Avengers" sequel to consider.)

Inspired by the comic created by Jack Kirby, S.H.I.E.L.D. - the Strategic Hazard Intervention Espionage Logistic Directorate - is a secret law enforcement agency led by Nick Fury, who recruits aid from Iron Man, Thor, Captain America and the Hulk.

The live-action series would be a return to TV for "Buffy the Vampire Slayer" and "Firefly" creator Whedon, who has a three-year exclusive deal in place with Walt Disney.

# ACADEMY COLLEGE NEWS

## COLLEGE OF ZOMS AND MUMS

**Commodore Cher Schleigh**  
*Director*

[cherschleigh@gmail.com](mailto:cherschleigh@gmail.com)

**c/o Home Networks Plus PO Box 55304  
Trenton, NJ 08638**

These courses will enable the student delve into the horror side of Zombies and Mummies. Most of the exams are rated V=Violent, AC=Adult Content, AL=Adult Language, and BN=Brief Nudity. Courses are for MATURE audiences only. Sources used will be a mix of internet, television show or movie.

School of ZOMS:

MUM 105 – The Mummy's Ghost

MUM 106 – The Mummy's Tomb

MUM 107 – The Mummy's Curse

MUM 108 – The Mummy's Shroud

MUM 109 – The Mummy 1959

MUM 119 – Pharaoh's Curse

\*\*\*More courses to come\*\*\*

## CADET PREPARATORY COLLEGE

Drum roll please.....I am pleased to announce that we have a recipient to the Cadet Honor Star Award.

**Katherine Lightheart** earned our Cadet Honor Star Award for completing all courses with HONORS and DISTINCTION in the Cadet Cardassian Orientation College. It may take a while to get to her as she lives in Chile but I have mailed out her certificate and pin.

Remember those of you who direct Cadet Colleges that when you have a Cadet who has fully completed a Cadet College with Honors and/or Distinctions to let me know so I can send that Cadet the same Award. They can earn as many awards as there are Cadet Colleges.

I'd love to see a Cadet weighed down by loads of star pins.

Peg Pellerin

# ACADEMY COLLEGE NEWS

## COLLEGE OF FIRE AND RESCUE STUDIES

Vice Admiral Glen Diebold,  
*Director*  
[Ussniagara@roadrunner.com](mailto:Ussniagara@roadrunner.com)  
19 Mafalda Drive  
Cheektowaga, NY 14215- 2017

These courses have been and are being developed to work with the Starfleet Surgeon Generals certification program for Starfleet Fire and Rescue personnel.

The Courses will cover Fire Fighting and Rescue procedures and is meant to familiarize the student with the basics of Fire Fighting and Rescue without being an in depth training manual.

CFRS subject matter will be designated by a capital letter following CFRS and prior to the course number

CFRS-H-101 An Introduction to Hazardous Materials (Haz Mat)  
CFRS-H-102a Part 1 of three courses regarding Haz Mat glossary  
CFRS-H-102b Part 2 of three courses regarding Haz Mat glossary  
CFRS-H-102c Part 3 of three courses regarding Haz Mat glossary  
CFRS-H103 Understanding Haz Mat incidents

## COLLEGE OF NCIS

Vice Admiral James Herring,  
*Director*  
[hqfedlegion@hotmail.com](mailto:hqfedlegion@hotmail.com)  
929 Park Ave  
Leavenworth, KS 66048

The courses in the CON cover Television series which factually illustrate Police and investigative procedures in Television

### School of NCIS

These courses are derived from the CBS Television series by the same name, and factually represent the workings of the Naval Criminal Investigative Service.

NCIS 101 through NCIS 106 cover the First season of the series with questions derived from each episode.

NCIS 101 covers episodes 1 through 4  
NCIS 102 covers episodes 5 through 7  
NCIS 103 covers episodes 8 through 10  
NCIS 104 covers episodes 11 through 13  
NCIS 105 covers episodes 14 through 16  
NCIS 106 covers episodes 17 through 19

- CEK 104 - Entertainment Knowledge Part 4
- CEK 105 - Entertainment Knowledge Part 5
- CEK 106 - Entertainment Knowledge Part 6
- CEK 107 - Entertainment Knowledge Part 7
- CEK 108 - Entertainment Knowledge Part 8
- CEK 109 - Entertainment Knowledge Part 9
- CEK 110 - Entertainment Knowledge Part 10

## COLLEGE OF IRWIN ALLEN

**UNDER CONSTRUCTION**  
**SEEKING DIRECTOR**  
**PLEASE CONTACT ANNIE WHEELER**

Irwin Allen the nickname of "The Master of Disaster" for his work in film, but he was also as notable for the creation of a number of television series. In television, he became the most successful producer of science fiction television shows in the 1960's.

Besides the shows covered in this college, he had two other television series, but they were not science fiction themed, nor were they as successful as these. He did have success in the film genre, giving us such movies as *The Poseidon Adventure* and *The Towering Inferno*.

### Lost in Space

LIS-101 - Lost in Space-Characters (1965)

LIS-102 - Lost in Space-Episodes (1965)

LIS-103 - Lost in Space-Main Characters (1965)

LIS-104 - Lost in Space-Technology (1965)

LIS-105 - Lost in Space-Trivia (1965)

### Land of the Giants

LOG-100 - Land of the Giants Overview

### The Time Tunnel

TIM-100 - The Time Tunnel Overview

### Voyage to the Bottom of the Sea

VBS-101 - Voyage to the Bottom of the Sea-Characters

VBS-102 - Voyage to the Bottom of the Sea-Episodes

VBS-103 - Voyage to the Bottom of the Sea-Main Characters

VBS-104 - Voyage to the Bottom of the Sea-Technology

VBS-105 - Voyage to the Bottom of the Sea-Trivia

## COLLEGE OF SHERLOCK HOLMES

**Admiral George Anne Wheeler  
114 Weber Street  
Havre de Grace, MD 21078  
badwolf827@gmail.com**

Sherlock Holmes is a one-of-a-kind iconic figure in literature, stage, radio, film, television and audio drama. Created by Arthur Conan Doyle; Holmes first appeared in publication in 1887.

Sherlock Holmes continues to reemerge time and again as each new writer or director envisions Holmes and Watson a bit differently. And we can't have Holmes without Watson as the chronicler of the adventures.

It really doesn't matter where Sherlock has his residence or in what place in time the story takes place because as Steven Moffat says, "...Other detectives have cases, Sherlock Holmes has adventures, and that's what matters."

As Holmes might say, quoting Shakespeare..."The game is afoot."

BAB 101—A Scandal in Bohemia

BAB-102—The Dancing Men

BAB 103—The Naval Treaty

## NO COLLEGE HERE BUT... HAPPY HOLIDAYS!!!

# ACADEMY COLLEGE/STAFF NEWS

Page 8

**Carol Thompson has assumed the Deanship of the Institute of Military Studies (IOMS) and the Directorship of Starship Operations.**

**The College of Burn Notice has been added to the Institute of Intelligence and Espionage (IOIE), directed by Carol Thompson.**

**The College of Vertebrate Biology was added to the Institute of Life Science Studies (IOLSS), directed by Carol Thompson.**

**The College of Intelligence in the Media has been split into the College of Intelligence in the Movies (CIM) and the College of Intelligence on TV (CITV). Carol Thompson is still directing the CIM and Annie Wheeler is directing the CITV. Both colleges may be found in the Institute of Intelligence and Espionage (IOIE).**

**George Ann Wheeler has created the College of Sherlock Holmes.**

**Patricia Baxter has assumed Directorship for the College of Federation Studies and the College of Cadet Federation Studies.**

**Cher Schleigh has created the College of ZOMS and MUMS and has assumed Deanship of the Institute of Life Science Studies (IOLSS).**

**Peg Pellerin has created the College of North American Indians. The CNAI may be found in the Institute of History and Government.**

**Glen Diebold has created the following colleges: CMIK: Coming of Age, CMIK: The Electronic age, CMIK: The Civil War, CMIK: The Nations Military Beginning, CMIK: WWII, CMIK: Military Trivia, College of Entertainment Knowledge and the College of Fire and Rescue Studies**

**The Institute of Performing Arts and Entertainment: Colleges that are currently offered in the IOPE are the College of Action and Drama Movie, College of Cinematic Comedy, College of Entertainment Knowledge, and College of Sherlock Holmes. Soon to be added will be the College of Shakespearean Plays and the College of Musicals.**

**James Herring has created the College of Cinematic Comedy. He has also created the College of NCIS in the Institute of Police, Fire and Rescue. The first season is now open for students.**

**Jamie Delantonas has assumed directorship of the College of Cadet Vulcan Academy of Sciences.**

**The name of the Institute of Law Enforcement and Evidence (IOLEE) has been changed to the Institute of Police, Fire and Rescue (IOPFR).**

## ACADEMY INFORMATION

Further information about the Academy, its staff and faculty, courses offered, and scholarships will be found at the following website:

<http://acad.sfi.org/courses/index.php>

## FUTURE PAST

## SO YOU WANT TO BE A DIRECTOR

Basic requirements are: Be at least 18 years of age and have taken OTS and OCC.

To assume a vacancy, you must pass all of the exams in the College, or if a large college, 75% of the exams.

To direct a College of your own creation, first check the College catalogue to make certain your idea is not already being used.

If the concept is not being used elsewhere, submit a College outline, exam, and key to the Course Development Contact, Carol Thompson at: [betazoid@mosquionet.com](mailto:betazoid@mosquionet.com)

She will determine where your College fits within the Academy structure and introduce you to your Dean, who will lead you through the approval process.

08/09/2012 Killough, Wayne

# HELEN C. PAWLOWSKI

Pawlowski, Helen (nee Callahan) died on Sunday July 29, 2012, at the age 90. Wife of the late Sylvester Pawlowski; mother of Madonna (Lloyd) Kraatz and Timothy (Leslie) and Terance Pawlowski; grandmother, great grandmother and great-great grandmother. Services: Memorial services were held Saturday, August 18 in the Chapel of Sherbrooke Village, 4005 Ripa Ave. A quintessential Trekkie, Helen was an Admiral in Starfleet (the fan organization), organized her own fan chapter (Space Station Troubadour) and knitted her own uniforms. Memorials may be sent in her name to the Starfleet Scholarship Fund, PO

Box 8213, Bangor ME, 04402 or Alexian Brothers Sherbrooke Village Spirit Fund. Helen donated her body to the Forensic Anthropology Center (the Body Farm) of the University of Tennessee.

## The first American woman in space, died July 23, 2012 after a 17-month battle with pancreatic cancer.

Sally Kristen Ride, America's first lady in space, was remembered Monday as a reluctant celebrity who cared deeply about the nation's space program and devoted her post-NASA career to keeping middle-school kids -- especially girls -- hooked on science, math, technology and engineering. She is also remembered as a loving partner to Tam O'Shaughnessy, with her for 27 years.

Ride, 61, died Monday after a 17-month battle with pancreatic cancer. Her death came 29 years and a month after she broke a gender barrier by launching into space aboard shuttle Challenger.

Ride is survived by her partner of more than two decades, Tam O'Shaughnessy; her mother, Joyce; her sister, Bear; her niece, Caitlin; and nephew, Whitney; as well as her staff of 40 at Sally Ride Science.

O'Shaughnessy, at Ride's side during the astronaut's lengthy battle with pancreatic cancer, co-authored four books with Ride and is a professor emerita of school psychology at San Diego State University, and chief operating officer and executive vice president of Ride's foundation, Sally Ride Science.

In Ride's death, many are asking: Who is Tam O'Shaughnessy? The answer is someone who closely shared Ride's passion for science and space.

According to [sallyridescience.com](http://sallyridescience.com), O'Shaughnessy "helped found Sally Ride Science because of her long-standing commitment to science education and her recognition of the importance of supporting girls' interests in science. She finds her work with Sally Ride Science irresistible."

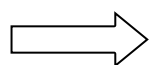

"(Ride) lived her life to the fullest, with boundless energy, curiosity, intelligence, passion, joy, and love," friends wrote in a statement posted on the website of her business, Sally Ride Science. "Her integrity was absolute; her spirit was immeasurable; her approach to life was fearless."

Ride became a household name when she rocketed into orbit on June 18, 1983. But she never was at ease with fame.

"Sally was a very private person who found herself a very public persona. It was a role in which she was never fully comfortable," said fellow U.S. astronaut Steve Hawley, who was married to Ride from 1982 through 1987.

"While she never enjoyed being a celebrity, she recognized that it gave her the opportunity to encourage children, particularly young girls, to reach their full potential," Hawley said.

"Sally Ride broke barriers with grace and professionalism -- and literally changed the face of America's space program," said NASA Administrator Charles Bolden, also a fellow astronaut. "The nation has lost one of its finest leaders, teachers and explorers. Our thoughts and prayers are with Sally's family and the many she inspired. She will be missed, but her star will always shine brightly."

Cont...

An accomplished physicist, astronaut, author and entrepreneur, Ride also was an accident investigator and an influential space policy player. She was the only person to serve on the presidential commission that investigated the 1986 Challenger accident as well as the 2003 Columbia Accident Investigation Board.

Famously, she concluded that NASA made the same types of errors in judgment and decision-making with the technical problems that led up to both accidents. Fourteen astronauts were killed in the tragedies.

President Barack Obama called Ride "a national hero and powerful role model."

"Sally's life showed us that there are no limits to what we can achieve, and I have no doubt that her legacy will endure for years to come."

Born May 26, 1951, in Encino, Calif., Ride's father was a professor of political science and her mother was a counselor. She grew up playing with a chemistry set and a telescope. A stellar tennis player, she passed up an opportunity to become a professional tennis player and instead became an astronaut.

After seeing a story about NASA seeking astronauts for its space shuttle program, Ride -- and 8,000 other people -- sent in a job application. From them, the "Thirty-Five New Guys" -- the nickname for the 1978 class of astronauts -- were selected. Six of the new guys were women. Ride was one of them.

Ride became the youngest astronaut to fly in space at age 32. She and a crew of five deployed two communications satellites and carried out several science experiments.

Ride flew again on Challenger in 1984. She and six crewmates deployed an Earth sciences satellite and a technology demonstration spacecraft.

She was scheduled to fly a third mission in 1986, but the shuttle fleet was grounded indefinitely after the Challenger accident.

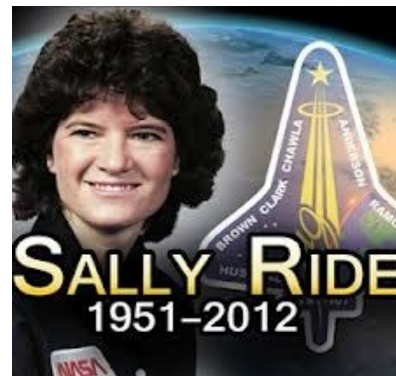

Ride retired from NASA in 1987 after a stint at NASA Headquarters in Washington, D.C., where she produced an acclaimed report on the future of U.S. Human Space Flight.

She started Sally Ride Science -- a company that holds science festivals for middle-school students around the country -- in 2001. And she served on an Obama administration committee that charted a new course for U.S. Human Space Flight in 2009.

Controversial in some circles, the course calls for NASA to invest in the development of commercial space taxis to ferry astronauts to and from the International Space Station and other destinations in low-Earth orbit.

The move would free up NASA to develop the rockets and spacecraft required for deep space missions to the moon, Mars, asteroids or other interplanetary destinations.

"I'm honestly excited about the plan. I think it gets NASA back doing what NASA should be doing, which is focusing on the technologies and focusing on the things that are hard -- the grand challenges of space exploration," Ride told Florida Today in 2010.

## Neil Armstrong's death prompts yearning for America's past glories

Credit: Paul Harris in Tampa, The Guardian, Sunday, August 26, 2012

Death of first man on the moon sparks tributes and expressions of regret over comparative lack of space travel since 1972.

The death of [Neil Armstrong](#), the first man to walk on [the moon](#), has prompted a bout of soul-searching about America's national destiny as well as mourning for an icon of the 20th century.

As tributes continued to pour in on Sunday for the former astronaut who died aged 82 there were also expressions of regret that no human has been back to the moon since 1972, just three years after Armstrong set foot on it and gave his famous "giant leap for mankind" speech.

Elliot Pulham, chief executive of the [Space](#) Foundation, decried today's lack of backing for America's space agency [Nasa](#), compared with the vast resources devoted to the moon landings programme in the 1960s.

"In this age of timid exploration goals and paltry Nasa budgets, Armstrong looms as a larger-than-life reminder of what our nation was once capable of," he said. Pulham said the real life drama of Armstrong's moon landing – watched by a fifth of the world's population – was unlikely to be repeated now except fictionally in a summer blockbuster. He said: "In an age when Hollywood and professional sports manufacture so-called 'heroes', Armstrong exemplified the right stuff. He was the real deal."

Armstrong died on Saturday following heart problems that ensued after he underwent bypass surgery near his Ohio home earlier this month. His recovery had been thought to be going well, and his death came as a surprise to many.

A statement released by his family gave few details, but spoke of a "reluctant American hero" and said to those who might want to pay tribute to him: "Honour his example of service, accomplishment and modesty, and the next time you walk outside on a clear night and see the moon smiling down at you, think of Neil Armstrong and give him a wink."

Speaking from the White House, Barack Obama said the self-declared "nerdy" engineer was "among the greatest of American heroes – not just of his time, but of all time". He added: "And when Neil stepped foot on the surface of the moon for the first time, he delivered a moment of human achievement that will never be forgotten."

Armstrong's crew member on [Apollo 11](#) and the second man to walk on the moon, Buzz Aldrin, said he was "deeply saddened" by the loss of his good friend and "space exploration companion" with whom he had hoped to mark the 50th anniversary of their mission in 2019.

"Whenever I look at the moon I am reminded of that precious moment, over four decades ago, when Neil and I stood on the desolate, barren, yet beautiful, Sea of Tranquility," he said in a statement. "Looking back at our brilliant blue planet Earth suspended in the darkness of space, I realised that even though we were farther away from Earth than two humans had ever been, we were not alone."

"Virtually the entire world took that memorable journey with us. I know I am joined by many millions of others from around the world in mourning the passing of a true American hero and the best pilot I ever knew. My friend Neil took the small step but giant leap that changed the world and will forever be remembered as a historic moment in human history."

## Neil Armstrong Cont....

Across the US, there was a sense that he represented the achievement of a past age of American greatness. Many focused on how the bid for the moon had been begun by John F Kennedy who as president audaciously set the target of putting a man there in a 1961 speech.

Armstrong – a quiet man who shunned fame – seemed to symbolise that dream fulfilment of a national goal, rather than the current situation which has seen Nasa cancel or curtail numerous missions in the face of budget squeezes.

Former astronaut Eugene Cernan, the last man on the moon, said: "He [Kennedy] challenged us to do something people thought was impossible. What couldn't be done. Neil was the focal point of that ... He was the epitome of doing something that people thought was impossible." Others too mourned Armstrong by decrying the state of the US. "Today we cannot pass a budget through both houses of Congress in as much time as it took to send a man into orbit," wrote columnist Andrew Pasternak on the news and culture website [Policymic](#). "The time it took to rebuild lower Manhattan after 9/11 ... will be longer than it took to build an entire space program and send a man to the moon."

Of course, Nasa does have its modern triumphs. Its engineers have just achieved the remarkable feat of landing a nuclear-powered rover on Mars. The robotic geologist is designed to spend years on the Martian surface. Another Mars mission has also just been announced, this one involving a more simple lander designed to drill below the planet's surface.

But these endeavors do not even come close to matching the excitement of Armstrong's success: no doubt in part because of the human element.

Nasa administrator Charles Bolden seemed to hint at that in his statement of tribute. "As we enter this next era of space exploration, we do so standing on the shoulders of Neil Armstrong," he said. Armstrong is believed to have shared the sense of skepticism and dismay at Nasa's diminished ambitions. Eric Berger, who runs the [SciGuy science blog](#), revealed that earlier this month he had been forwarded an email that Armstrong and other space exploration veterans had been circulating. It expressed frustration at the current travails of Nasa and quoted Yogi Berra, an American baseball legend. According to Berger the quote read: "If you don't know where you are going, you might not get there."

## William Windom dies at 88

LOS ANGELES (AP) — William Windom, who won an Emmy Award for his turn in the 1969 TV comedy series "My World And Welcome To It" and went on to score guest appearances on several popular shows, has died.

Windom died Thursday of congestive heart failure at his home in Woodacre, north of San Francisco, his wife Patricia told the Los Angeles Times. He was 88.

Windom won acclaim in the short-lived NBC series for his role as John Monroe, a writer-cartoonist for a New York magazine who relied on his fantasy life to escape a middle-class Connecticut life.

The series was based on the work of the humorist James Thurber and Windom went on to develop a one-man touring act inspired by the same whimsical Americana.

Born in New York City on Sept. 28, 1923, Windom was named after his great-grandfather, a Minnesota congressman and former U.S. Treasury secretary. He attended Williams College in Massachusetts before joining the Army as a paratrooper in World War II. He later attended the University of Kentucky, among several other higher-education institutions, and decided to pursue acting.

The easy-going Windom was an in-demand television character actor for decades and scored guest appearances on several American TV staples, including episodes of "Twilight Zone" and "Star Trek" and appeared on more than 50 segments of "Murder, She Wrote" beginning in the mid-1980s. There, Windom played a Maine country doctor opposite series star Angela Lansbury's Jessica Fletcher.

He also played the part of the prosecuting attorney who parries in court with Gregory Peck's Atticus Finch in the 1962 movie "To Kill a Mockingbird."

Married five times, Windom is survived by his wife of 37 years and four children, Rachel, Heather, Hope and Rebel.

## Babylon 5 Star Michael O'Hare Dies at 60

**Michael O'Hare**, who starred as Commander Jeffrey Sinclair on the first season of the sci-fi series *Babylon 5*, died Friday after suffering a heart attack five days earlier. He was 60.

"This is a terrible loss for all *B5* fans, and everyone involved with the show wishes to convey their condolences to the O'Hare family," series creator **J. Michael Straczynski** wrote on his Facebook page: "He was an amazing man."

O'Hare left the show after the first season (Straczynski at the time called it a "mutual, amicable and friendly separation," with the star being ostensibly replaced by **Bruce Boxleitner**), but the actor came back for an episode in season two and back-to-back installments in season three to wrap up his character's storyline.

*Babylon 5*, from Warner Bros. Television, ran for four seasons on the short-lived Prime Time Entertainment Network and a final one on TNT from 1994-98.

On Broadway, the Chicago native appeared in the original 1989-91 production of **Aaron Sorkin's** *A Few Good Men* as Col. Nathan Jessup (**Jack Nicholson** earned an Oscar nomination for playing the role in the 1992 film).

His résumé also includes the primetime series *The Cosby Mysteries*, *Kate & Allie*, *Trapper John, M.D.*, *The Equalizer*, *Law & Order*, *L.A. Law* and *Tales From the Darkside* and the daytime soap *One Life to Live*.

# MARS CURIOSITY

## [Virtual Tours of Mars](#)

<http://mars.arounder.com/>

~Amanda at Worldstart

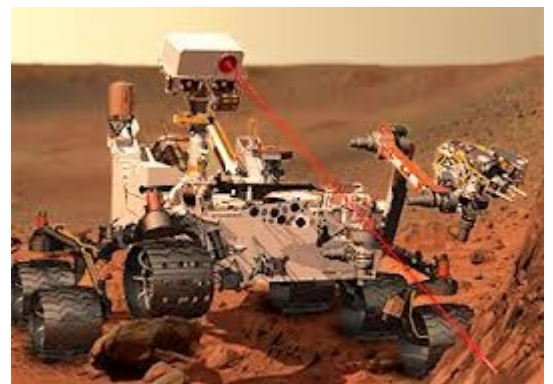

I'm still riding on a high from the deployment of *Curiosity* on Mars, so I was thrilled when I found this virtual tour of Mars site and couldn't wait to share it with you.

There are ten different virtual tours of Mars that you can check out. They are Mars Rover Curiosity, Mars Opportunity Erebus Crater, Pathfinder Mission 1997, Spirit Rover Hills Over Yonder, Spirit's Landing Site, Spirit Rover "Larry's Lookout", Spirit Rover "Everest" Panorama, Spirit Rover "Husband Hill Summit", and Spirit Rover "Independence" Panorama. Pick one to start your tour!

When the tour loads, you'll have a control panel in the bottom center of the screen with the options to zoom in and out, navigate left, right, up, and down, as well as make the panorama full screen. You can also navigate with your mouse by dragging it left, right, up, or down.

Once you've explored all that your tour has to offer, you can choose another tour from the lower right hand side of page (if you're not in full screen mode) just use the arrows to either side of them to scroll through your options. Pick a new one and then explore some more!

I hope that as Curiosity explores its mission that we receive more of these tours to experience.

GOOD EXAMPLE OF A BRAIN STUDY. IF YOU  
CAN READ THIS YOU HAVE A STRONG MIND.

# ANNOUNCING THE iPhone 5

By Alex Colon

September 12, 2012 05:22pm EST

Apple today [announced](#) the long-awaited iPhone 5 [at](#) . Boasting an all-new design, with 4G LTE and a larger 4-inch Retina display, Apple is calling it "the biggest thing to happen to iPhone since iPhone."

We've stacked up the specs for the iPhone 5 side by side against the iPhone 4S and the iPhone 4 to help determine which phone is right for you.

The biggest, most attractive feature of the iPhone 5 is its new design. The phone is 20 percent lighter, 18 percent thinner, and 12 percent smaller by volume than the iPhone 4S. At just 0.3 inches thick and 3.95 ounces, it's one of the thinnest, lightest smartphones available. That's a pretty major feat, considering that Apple has also increased the size of the display.

That's right. For the first time since the original iPhone, Apple has bumped the display up from 3.5 inches to 4 inches. The resolution has been boosted too, up to 1,136-by-640 pixels, which makes for the same 326 pixel-per-inch Retina display as the iPhone 4 and 4S. Color has been improved as well, with color saturation that's 44 percent greater than before. That additional screen size allows for added app functionality, and Apple claims that old apps will look and work just the same as new ones.

Arguably the greatest new feature is support for 4G LTE. This is the first LTE phone that Apple has released, and it will be able to tap into the super-fast new networks from AT&T, Sprint, and Verizon (provided you live in an LTE coverage area). The iPhone 5 also includes support for a number of other networks all around the world. And dual-band 802.11n wireless connectivity should accelerate your Wi-Fi experience as well.

The iPhone 5 is powered by Apple's powerful new A6 chip, which Apple claims is up to twice as fast as the A5 processor found in the iPhone 4S. It's also less power hungry, and Apple claims you can get up to eight hours of 3G talk time, eight hours of 4G LTE Internet use, or 10 hours of video playback on the iPhone 5. We recorded nine hours and 22 minutes of 3G talk time on the Verizon model of the iPhone 4S, so the number we see this time around will likely be even higher.

And for the first time in many years, Apple has upgraded its standard Apple Earphones to new Apple EarPods. Designed with fit and comfort in mind, the EarPods are futuristic-looking little earbuds with a built-in remote and mic. They've been engineered to minimize sound loss and maximize sound output using a number of strategically placed vents. Needless to say, these are likely to be a major win over those tinny Apple Earphones of yesteryear.

By Alex Colon September 12, 2012 05:22pm EST (cont.)

That's not the only improvement made for sound. The iPhone 5 has three microphones—one on the front, one on the back, and one on the bottom—which should make for clearer audio. And new noise-canceling technology reduces background noise even further.

Improvements have been made to the camera as well. It's still an 8-megapixel sensor, but now it's 40 percent faster, with better low-light performance and improved noise reduction. The phone's gyroscope, processor, and camera app also work together to create seamless, high-res panoramas up to 28 megapixels. And the front-facing camera has been given an update to 720p for HD FaceTime Calls.

Also new is the Lightning connector, which is smaller, more durable, and reversible than the previous 30-pin connector. There's an adapter for all your old 30-pin devices, so don't worry too much, but this one does look like it'll make it even easier to connect.

Siri has been upgraded, along with a plethora of new features in iOS 6. iOS 6 will also be coming to the iPhone 4S and iPhone 4 on [Sept. 19](#), but Siri is only available on the iPhone 4S and iPhone 5.

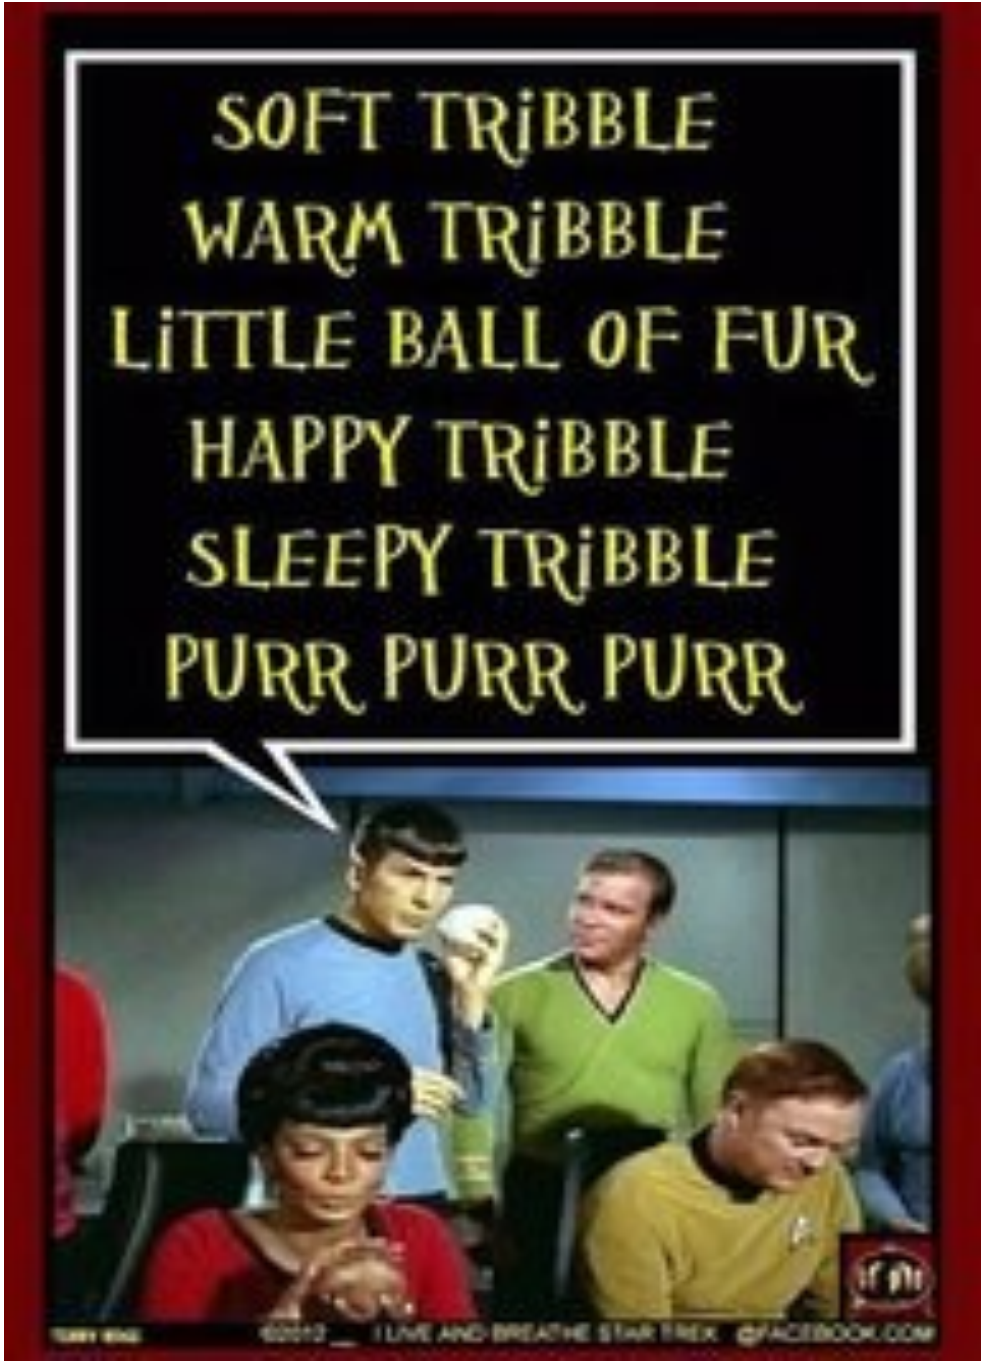

So is the new iPhone 5 worth it? You'll have to check back for our review before we can make that call, but right now, it looks like if you're willing to drop at least \$200, the iPhone 5 will offer some major upgrades over the iPhone 4S and iPhone 4.

If you're looking for a new, entry-level smartphone, and don't want to spend a lot of money, it's hard to beat a free iPhone 4. Still, an extra \$100 or two isn't all that much extra to spend over the life of a two-year contract, considering most contracts cost around \$100 per month. So if I were shopping around for a new iPhone (and I think I just might be), I'd put my money on the iPhone 5.

Apple iPhone Specs Compared
